Poarch Creek Indians FEDERAL SERVICES

Poarch Creek Indians Federal Services (PCIFS)* was formed by the Poarch Band of Creek Indians to support Federal customers. PCIFS is a super 8(a) enterprise and our companies bring more than 25 years of industry-leading expertise in a wide variety of markets. PCIFS provides the common connection and integration that enables our collective success.

The Poarch Band of Creek Indians have a variety of economic enterprises operating under its management structure. Together, these companies employ thousands of people throughout the country. The PCIFS portfolio of companies is proud of its connection to the only federally recognized tribe in the state of Alabama and shares the Tribe's values which guide all decisions.

Poarch Band of Creek Indians Values Statement

We act with fairness in all our decisions and policy applications inspiring others to trust our intentions and actions. This affirms our commitment to something bigger than any of ourselves and encourages all to persevere when we confront challenges along the journey. The respect we show for the contributions of all to our common purpose creates the platform for open and honest interactions. This leads to collaborative relationships and openness to new ideas and growing levels of accomplishment.

**Poarch Creek Indian Federal Services is the trade name
of ECKE Holding Company LLC*

Aviation Maintenance/Engineering Services

We provide systems engineering and logistics support for aviation support equipment to include system research, development, prototyping, system integration, TPS development, obsolescence mitigation and production services. We deliver a range of logistics and supply chain solutions to clients, reducing ownership of raw materials sources and distribution channels and offer engineering, integration, manufacturing and assembly services that are geared to support rapid prototyping and production requirements.

Manufacturing Services

We provide a full range of manufacturing technology and fabrication services including composite cutting/kitting services, inventory management, sub-zero cold storage and logistics services, various levels of metal fabrication ranging from agricultural to wind energy markets, CNC precision machining, and electronic kitting/component overhaul. All are executed at or above the international quality standards set forth by AS9100D, ISO, and NADCAP.

Business/Professional Services

We provide technical and professional services across U.S. Federal Agencies and the Department of Defense (DoD). Our professionals have spent decades providing quality support services in the areas of acquisition/contract management, program/project management, financial and budget support, and professional services. Services are provided in a cleared or uncleared environment both CONUS and OCONUS.

Technology Solutions

Our team has decades of experience developing and delivering technology solutions for the U.S. Government's biggest challenges, from Enterprise IT to Cybersecurity to Data Analytics. We also have a deep background in Systems Engineering and Integration across land, air, and space domains. We work with our customers to deliver next generation mission-focused solutions, today.

Construction Services

We specialize in all types of Construction Services to include Design-Bid-Build, Design-Build, new construction and renovations to our U.S. Federal and DoD customers. Our broad range of construction experience has helped advance our strategic growth initiatives while ensuring the utmost quality and service to our customers. Internationally we provide tactical logistics and construction support ensuring sound, secure, and resilient facilities in a cleared environment. We deploy our services utilizing sole source 8(a) contracts, BOAs, MACCs, and IDIQ vehicles.

Media/Communications Services

Our strength is our ability to leverage the latest technology to produce creative and effective communications products and services. By combining multiple forms of advanced media, we tell a compelling story that helps our customers achieve their goals. We become a strategic partner for our customers and help evaluate, identify, execute, and even monitor the success of their communications goals. Our contract teams include public affairs specialists, social media leads, communication analysts and researchers. We also put this experience to work in the private sector through marketing, brand development and management, communication planning and public relations.

Modular Facilities Support Services

We provide turn-key modular buildings/facilities for our U.S. Federal Agency and DoD customers in support of their Critical Missions. Our modular facilities professionals provide full design and engineering, submittals and factory production management/oversight, delivery and installation, and leasing services across the U.S. We support critical production support missions within secure environments, afloat environments, as well as provide for short and long term administrative, operational, dining and habitable environments. Leasing, Sale, and 100% Maintenance are core elements of our modular program.

Facilities Management/Maintenance Services

Every facility has specialized needs and requirements. We are committed to providing solutions that will reduce your overall costs and add value. We provide a wide array of facilities maintenance and support services to include property condition assessments, planned maintenance programs, project planning & management, site costs savings analyses, custodial/janitorial, and grounds maintenance.

CONTRACTING POSSIBILITIES

PCI Federal Services' (PCIFS) companies are 100% tribally-owned / small disadvantaged businesses. Our SBA 8(a) certified companies are able to receive up to \$100M sole source contracts for the Department of Defense and \$22M for Federal Agencies with no J&A per FAR 19.805-1(b)(2). These awards cannot be protested per 13 CFR 124.517(a).

PCI Federal Services is a growing Tribal federal contractor that is eager to demonstrate our innovative solutions and best in class customer service. Contact us to discuss competitive bid, sole source, and subcontracting opportunities.
